CLAIMS

What is claimed is:

- A material for processed food for weight reduction diets, comprising active ingredients, extracted from fish, that include histidine.
- The material for processed food for weight reduction diets of Claim 1, wherein said active ingredients including histidine are extracted from Bonito essence by membrane concentration.
- The material for processed food for weight reduction diets of Claim 1, wherein 12,000 mg - 20,000 mg weight percent of histidine is contained.
- 4. The material for processed food for weight reduction diets of Claim 1, being in a powder form that can be added to other foods, which is obtained from extracts from fish and processed to remove an odor and a flavor of said extracts.
- A dietary processed food, processed using the material for processed food for weight reduction diets of Claim 1.
